Additions \$100,000-\$250,000
George Jones Master Suite

With children and grandchildren living more than 700 miles away, these recent retirees needed more space to accommodate their frequent visitors. An 1,100 sq ft master suite was designed with 10-foot ceilings and hardwood floors throughout. The bedroom includes a wall of windows and a door to the porch, a favorite place for watching grandchildren play on the new bluestone patio. Walk-in closets line the hall leading to the new master bath. In the bath, Italian marble is used on the floor, counter tops, and on a bench in the oversized shower. The jetted tub is enclosed with white panels constructed to match the three floor-to-ceiling linen cabinets. Thanks to the architects Hester and Associates, the owners now have a beautiful master suite and adequate space for overnight guests.

Kitchen Remodel Over \$80,000
George Jones Kitchen

This 1973-built home was in dire need of a kitchen renovation. The kitchen was gutted and a wall removed between the kitchen and laundry room to accommodate a larger table and more cabinet and counter space. The existing pantry was also removed to make space for a wet bar, while a half bath was transformed into the new, larger pantry. Badly worn laminate flooring was replaced with hardwood to match the existing hardwood throughout the house. With the owners desiring a much brighter look in the kitchen, white cabinets, tile backsplashes and quartz counter tops were utilized. An island was added for additional prep space as well as a spot for guests to sit. These owners now have a larger and more inviting space for family and other guests.
